

One for All Data Protection

EasySafe™ protects all sensitive information in your computer, external hard disk, USB flash drive and SD card etc.

All corporate documents like financial reports, payroll records as well as your personal files like photos, videos and resumes are protected from prying eyes:

- when someone shares, services and repairs your computer.
- when you back up your files to a external hard disk.
- when you share your USB flash drive or even lose it.

You cannot lock your computer all the time but you can lock your sensitive data.

You can now have the peace of mind:

- when someone else uses, services or repairs your computer, you need not stand behind to monitor,
- when you back up your data to a external hard disk, it does not need to be locked it in a safe,
- when you share your USB flash drive or even lose it, don't worry, you have "easysafed" it.

Easy to use

We guarantee all PC users can use easySafe™ without any training or even reading the user manual, with a **14-day unconditional money-back guarantee** to ensure everyone's complete satisfaction with easySafe™.

Why easySafe™ ?

- **Value for money**
One product protects all your data storage devices.
- **2-Level security**
It comes with 2 levels hardware protection with international encryption standards (AES).

With our unique **DUAL** keys package, you can use **easySafe™** in...

PERSONAL ○ 1 for **daily usage** + 1 for **spare**

CORPORATE ○ 1 for **user** + 1 for **management control**

MANAGEMENT ○ 1 for **manager** + 1 for **secretary**

SCHOOL ○ 1 for **student** + 1 for **teacher**

PARTNER ○ 1 for **you** + 1 for **your partner**

Different easyKeys to share one computer-
you just share the same computer without
sharing the sensitive data.

One easyKey to control all the computers at
home, office and notebook.

easySafe™ cocok bagi perusahaan atau personal yang butuh untuk melindungi data-data rahasia dan penting. Ketika komputer anda digunakan orang lain atau ketika diperbaiki teknisi, tak usah takut, data anda tak bakal bisa dibuka.

Dibanding software enkripsi, easySafe™ sangat mudah dan sangat praktis penggunaannya. Juga jauh lebih aman, kerana kunci easySafe™ dan komputer terpisah, sehingga risiko kebobolan sangat kecil.
