```csharp
using System;
using System.Collections.Generic;
using System.Linq;
using System.Text;
using System.Threading.Tasks;

namespace List2
{
    class Program
    {
        static void Main(string[] args)
        {
            List<double> cucc = new List<double>(50);
            int szam;
            Random v = new Random();

            for (int i = 0; i < 50;i++ )
            {
                szam = v.Next(50);
                Console.WriteLine(szam);
            }
            int sum = 0;
            foreach (int x in szam)
                sum = sum + x;
            Console.WriteLine("Atlag={0}", (double) sum / 2);
        }
    }
}
```
