

## Art house

One of the interesting programs of the Treasure Island meeting in Cristur was Corund. Hungarian and Italian friends together on Saturday morning we travelled to Corund to view the pottery products.

The trip was very short, we hardly had time to prepare the friends for the spectacle they are going to see. After we got there despite the rain everyone was excited and smiled out of the bus.

We went to the pottery work shop, where we looked at how the different ceramic pots are prepared: the jugs, plates, glasses, candlesticks, ornaments and other nice stuff. We learnt also that these objects are all made by hand. First they format the dishes, and decorate then they burn them in furnaces. After this individual patterns are painted on it.

Once we have gained insight into the secrets of pottery we had one hour of free time, when everybody could buy. Everybody bought at least one of these products for family or for friends in memory.

Everybody really enjoyed this trip and when we started off home, everybody was sad that we had to leave Corund, the home of the artisans.
