**PART 2**

**PUZZLE 6**

## Sudoku Quadruplets

Four Sudoku grids are given, divided into regions differently, standard Sudoku rules apply in all of them. Their solution is identical. It is sufficient to complete one of the grids.

points

**PART 2**

**PUZZLE 9-10**

**Sudoku - Outside Couple**

Standard Sudoku rules apply. Two-digit figures around the grid indicate that those two digits appear consecutively in that row/column. E.g. if there is a 57 above/below column 1, then column 1 has its digit 5 immediately below digit 7.

**PART 2**

**PUZZLE 12-13**

**Roman Numerals Sudoku**

Standard Sudoku rules apply. Clues are based on the Roman numeral representation of the digits. However, some letters may have been erased (e.g. a „I” clue may plausibly denote 1, 2, 3, 4 or 6 but not 5). You can solve the puzzles using Roman OR arabesque numerals, but you can not mix them.
