

2. Modern Times

Create a presentation to advertise Charlie Chaplin's last silent film based on the example and the description.

Save your work in the default format of the program as *chaplin*. The pictures required for the presentation are located in files *modern_1.gif*, *modern_2.jpg*, *modern_3.jpg* and *modern_4.jpg*, the text is in file *forras.txt*.

1. The background of each slide has horizontal colour transition, at the top they are light brown, code RGB(223, 192, 141) and at the bottom they are white.
2. The colour code of the text is RGB(80, 45, 30) and the colour code of the titles is RGB(100, 50, 0), of brown shade.
3. Type the text of the presentation or copy it from file *forras.txt* into the slides according to the example.
4. On the 1st slide the font size of the title is 54 points and its style is bold. The size of the subtitle is 40 points and its style is italics. In the bottom right corner picture *modern_1.gif* should appear.
5. On the 2nd slide, *modern_2.jpg* appears on the left and the film information appears in a table on the right. The width of the picture should be 9 cm, its size should be scaled proportionally. The font size of the text in the table is 24 points, in the first column the style is bold. Set the table and column widths so that the words and the names are not broken into several lines.
6. On the 3rd slide the text should appear without bullets, according to the example. In the bottom right corner two pictures should appear after each other during the slide show: *modern_3.jpg* and *modern_4.jpg*. Set the width of both pictures to 12 cm using proportional scaling.
7. Set the slide show parameters for the presentation. The slide transition should happen on click, the titles and the texts should appear immediately. The pictures should appear from the right on all three slides, without click, after the texts. The exception from this is *modern_4.jpg* on the 3rd slide, which should appear from the right, above picture *modern_3.jpg* on click and cover it completely.
