

1. Student cuisine

Yummy Student Cuisine offers a cheap and delicious lunch opportunity to several hundred students. They store the data of the menus in a text file and every day they create the printout posted on the door of the restaurant based on this file

Create the printout based on the following instructions and the example, using a form document.

The text required to create the main document is located in file *illik.txt* and the data source is located in file *menu.txt*.

Field names in the data source: *day*; *hour*; *minute*; *AmenuSoup*; *AmenuMaincourse*; *AmenuPrice*; *BmenuSoup*; *BmenuMaincourse*; *BmenuPrice*.

1. When creating the main document, use an A4-sized page with landscape orientation. Set the margins to 2 cm at the top and at the bottom and 2.25 cm on the left and on the right. Save the document as *egynap* in the default format of the word processor. Apply wavy or double border on the page.
2. Use font type Times New Roman or Nimbus Roman with size 48, 16, 14 and 10 points throughout the document.
3. Type the text “Yummy Student Cuisine” at the top of the document and format it according to the example. The text should be expanded and pay attention to suitable paragraph spacing. Attach a footer that reads “The name of the restaurant is imaginary, if such a restaurant exists, it is only accidental.” to the title. The footer should be marked with character *.
4. Insert a table with two columns under the title. The table columns should be of equal width.
5. Convert document *egynap* into a form document using *menu.txt* as data source.
6. Use each field in the data source to fill the left cell, type in the missing text according to the example. Pay attention to not applying empty paragraphs anywhere.
7. Format the three-three paragraphs forming the menu using indents and tabs. Tab positions and indents should be set to integral cms. Paragraphs “Menu A”, “Menu B” and “Drinks” should have the same characteristics. The formatting of the 4 lines containing soups and main courses should also be identical.
8. Create the list of drinks using a two-level list. You can apply arbitrary bullets in the list.
9. Insert the content of file *illik.txt* into the cell on the right.
10. Format the title in the cell in the same way as text “Our offer for Tuesday”. Format the other three paragraphs of the cell identically.
11. Find the names of tableware in the right cell and format them in italics. Do not look only for the forms knife, fork, spoon but also for forms originating from them, e.g. knives, teaspoon.
12. Insert picture *uveg.gif* into the document. The height of the picture should be 3.5 cm, its width should be 2 cm. Position the picture according to the example.
13. Set automatic hyphenation and then save the document.

14. Merge the main document with the data source and save the merged document as *napok* in the default format of the word processor. (If the result of the merger is several independent documents, add a serial number to the name *napok*).

40 marks

Yummy Student Cuisine*

Our offer for Tuesday

Drinks

- ❖ *Mineral waters*
 - Tótifalvi
 - Tompaküti
- ❖ *Fruit juices*
 - Orange with pulp
 - Peach with pulp

Lunch is at 12³⁰

What is proper...

- Never bite the bread at the table, always break from it. The bread slice should always be at your left hand.
- If the soup contains meat or sausage, first take out the due portion and then ladle out the soup on it. The pieces should be consumed with the soup and should not be set aside until the end. Meats should be eaten with a *knife* and a *fork*, except for meatballs. Meatballs should be eaten with a *fork*. Meat should not be sliced up at once, only bit by bit. If the meat is bony, you should prop it with your *fork* and cut off the pieces of meat with your *knife*. You can also seize the bone of small poultry with your hand.
- Rice should be eaten only with a *fork*, semolina pudding and rice pudding should be eaten with a *spoon*. Dumplings should also be eaten only with a *fork*. Compote is served in a compote bowl, from here it should be eaten with a *teaspoon*. Kernels should not be spit out, they should be set aside using the *teaspoon*.

* The name of the restaurant is imaginary, if such a restaurant exists, it is only accidental.
