## Preface

This preface provides information about:

- Who should read this guide
- Intellisync for NEC 616 (Intellisync)
- Other available documentation

## Who Should Read this Guide

---

Users who are responsible for installing, configuring, and using Intellisync for NEC 616 should read this guide.

## Intellisync for NEC 616

---

The Intellisync for NEC 616 (Intellisync) application provides 3-way synchronisation of your Contacts, Calendar, and To Do records between:

- Your phone, attached to your PC with a USB cable
- A PIM (Personal Information Manager) system on your computer
- A 3 Sync server system over the Internet

When you make changes to your phone records, they are updated on all systems after you perform a synchronisation.

With Intellisync, you can define and save your settings, which are then used during synchronisation. See the *Intellisync for NEC 616 User Guide* for configuration and setting information.

## Documentation

---

For additional information on working with Intellisync, refer to the documentation available from within the Intellisync installation directory:

- *Intellisync for NEC 616 User Guide*—Configuration and user information for setting up Intellisync.  
PDF format available from the Intellisync installation directory.
- **Readme**—Important user issues that did not make it into any of the main product documents.  
Text file available from the Intellisync installation directory.
- **Online Help**—Help available from within the application (WinHelp).

## Lite and Full

---

Intellisync is available in Full and Lite versions. For example, Intellisync Lite does not support the Filters tab feature. If your Intellisync does not have all the features described in this guide or if some features are greyed out, you can upgrade to a "full" version of Intellisync. The Full version includes support for additional PIMs (such as Lotus Notes) and additional synchronisation functionality such as Filtering and Custom Field Mapping. Go to [www.pumatech.com](http://www.pumatech.com), click the shopping cart and visit the Pumatech Web store for more information.

The following table notes Intellisync Lite and Full features.

| <b>Feature/Function</b> | <b>Lite</b> | <b>Full</b> |
|-------------------------|-------------|-------------|
| Conflict Resolution     | X           | X           |
| Filtering               |             | X           |
| Confirmations           |             | X           |
| Custom field mapping    |             | X           |
| Multiple folder         |             | X           |
| <b>Supported PIMs</b>   |             |             |
| Lotus Notes 4.6, 5/6    |             | X           |
| GroupWise 6.5           |             | X           |
| Outlook 2000/2002       | X           | X           |
| Outlook Express         |             | X           |
|                         |             |             |

# System Requirements

---

Read this chapter to learn about the software and hardware system requirements and supported PIMs (Personal Information Manager, for example Microsoft Outlook).

## Hardware and Software Requirements

---

The following sections list and describe the system requirements for the computer on which Intellisync will be installed.

**Note:** Your system must already have the phone software or drivers installed. Your phone must be connected to the USB cable attached to your PC. For more information, refer to your phone documentation.

### Hardware Requirements

---

- **Processor:** 133 Mhz or higher
- **RAM:**
  - 24MB for Windows 98SE
  - 64MB for Windows 2000
  - 128MB for Windows XP
- **Drives:**
  - Hard Disk with 30MB available
  - CD-ROM drive (if installing from CD)
- **Supported Connections:** USB

### Software Requirements

---

- Microsoft Windows 98SE/2000/XP (Professional or Home editions)
- Intellisync for NEC 616 software

## Supported PIMs

---

- Microsoft Outlook 97/98/2000/XP
- Lotus Notes 4.6
- Lotus Notes 5.0/6.0
- Novel GroupWise 5.5.2, 5.5.4, 5.5.4.1, 6.0, 6.0x, and 6.5
- Outlook Express 4.0/5.0/5.5/6.0

# Installation

---

Read this chapter to learn:

- How to install Intellisync for NEC 616 (Intellisync)
- Where to go for configuration and setting information
- How to uninstall Intellisync

## Installing the Application

---

Navigate to the directory that has the Intellisync application executable.

**Note:** Your system must already have the phone software or drivers installed. Your phone must be connected to the USB cable attached to your PC. For more information, refer to your phone documentation.

**To install Intellisync on your PC:**

1. Navigate to the directory that contains the Intellisync executable.  
Your system administrator can answer any questions you have about the executable's location.
2. Double-click the Intellisync application executable.
3. Follow the on-screen installation instructions.

- Unless you specify a different location, Intellisync is installed to:

**C:\Program Files\Pumatech\Intellisync for NEC 616**

(where C is the drive on which Windows is installed)

- After installation, to open the Intellisync application, select:

**Start\Programs\Pumatech\Intellisync for NEC 616\Intellisync for NEC 616**

## Opening the Application

---

**To open Intellisync:**

1. Go to:  
**Start\Programs\Pumatech\Intellisync for NEC 616\Intellisync for NEC 616**  
The Intellisync icon (  ) appears in the system tray.
2. Double-click the Intellisync icon.  
The Intellisync configuration dialogue opens.

## Configuration

---

Refer to the *Intellisync for NEC for Portable Phones User Guide* for configuration and settings information.

## Uninstalling the application

---

Follow these steps to uninstall Intellisync.

**To uninstall Intellisync for NEC 616 on your PC:**

1. Go to:  
**Start\Programs\Pumatech\Intellisync for NEC 616**
2. Select **Uninstall Intellisync for NEC 616**.
3. Follow the on-screen instructions.
